

Our softwood veneer begins with the 350,000 trees that we plant each year. These seedlings are planted by elevation and seed zone to maintain the best genetics for future generations. Once harvested, timber from our forestlands is shipped to our state-of-the-art softwood veneer mill in Northern California where we produce Douglas fir, white fir, and pine veneer in 4', 8', 9' and 10' lengths.

Our softwood veneer comes in a variety of thicknesses and lengths. We manufacture our softwood veneer to the tightest tolerances, making it ideal for use in the manufacturing of hardwood plywood, softwood plywood and laminated veneer lumber.

Applications & Benefits

Softwood veneer produced at our Yreka veneer facility is utilized across a broad spectrum of veneer-based products. These products include hardwood plywood, laminated veneer lumber and softwood plywood (commodity and industrial).

One of the main benefits of our softwood veneer is its ability to bolster the quality of hardwood plywood panels. As hardwood veneer skins become increasingly thinner, the quality of the softwood under the veneer face and back becomes essential to the quality of the panel.

Peeler Cores

Timber Products offers softwood peeler cores in 8', 9' and 10' lengths with a minimum diameter of 3.5". Common uses for softwood peeler cores are landscape timbers, pressure treated posts and pallet stock lumber.

Third-Party Certification

All products manufactured at our Yreka veneer facility utilize wood from our forestlands. We offer veneer certified with the Forest Stewardship Council® (FSC®).

Species

- Douglas Fir
- White Fir
- Pine

Thicknesses

- 1/10" – 1/8"

Lengths

- Douglas Fir & Pine: 4', 8', 9' or 10'
- White Fir: 4' or 8'

Also Available

Peeler Cores

- 8', 9' and 10' lengths
- 3.5" minimum diameter

Timber Products Company is one of the nation's largest and most respected manufacturers of a comprehensive range of wood products.

As an independently owned, fully integrated company with dedicated manufacturing facilities in both the western and eastern United States, we

provide immediate access to a vast selection of products and services. We've implemented new technologies to make our operations more efficient and our products more cost-effective. We can respond to your needs faster, with greater flexibility and with an absolute assurance of quality.
