

Ampine, a division of Timber Products Company, offers many products that support LEED® v4 credits and other certifications. The chart below represents all of our products, including industrial, moisture-rated and fire-rated panels, as well as panels with higher physical properties. Ampine particleboard

and composite panel products are available in a variety of thicknesses, widths and lengths. They can be used for a variety of applications including cabinetry, countertops, furniture components, casework, shelving, retail fixtures, office furniture, underlayment and stair treads.
